

solving the protein structure pdf

Proteins are assembled from amino acids using information encoded in genes. Each protein has its own unique amino acid sequence that is specified by the nucleotide sequence of the gene encoding this protein.

Protein - Wikipedia

Scientists from the University of Sheffield have solved the structure of a photosynthetic protein to reveal how it converts near-infrared light into an electrical charge.

Photosynthetic protein structure that harvests and traps

In order to overcome the insufficient prediction of binding affinity calculated by recent scoring functions, the protein-ligand interaction and compound 3D structure information are used for analysis.

Solon-Biet et al. look at whether health and aging are influenced by macronutrient balance or calorie intake in mice by investigating the effects of diets differing in protein, carbohydrate, and fat content. Diets low in protein and high in carbohydrates increase lifespan, while calorie restriction through high-protein diets does not extend life.
