

spline functions and multivariate pdf

Spline functions entered Approximation Theory as solutions of natural extremal problems. A typical example is the problem of drawing a function curve through given $n + k$ points that has a minimal norm of its k -th derivative.

My very first paper dealt with multivariate (well, bivariate) splines and I was then quite certain of what a multivariate spline, i.e., a spline function of many variables, might be.

In this paper we explain how to use multivariate splines for solving scattered data fitting problems, and survey some recent results how well spline surfaces approximate the given data.

MULTIVARIATE ADAPTIVE REGRESSION SPLINES* Jerome H. Friedman, Stanford Linear Accelerator Center and Department of Statistics Stanford University Stanford, California 94309 ABSTRACT A new method is presented for flexible regression modeling of high dimensional data. The model takes the form of an expansion in product spline basis functions, where the number of basis functions as well as the ...
